

BALI
SAMA SAMA

Premium Glassware, Considered Candles & Natural Scents From The Island Of Bali

We work with traditional artisans to create unique, high-quality glassware, candles and scents using local craftsmanship, recycled glass and plant-based wax and oils to form a range of products that stand out from the crowd and give back to local communities.

BALI
SAMA SAMA

OUR MISSION

BALI
SAMA SAMA

A Way Forward

Bali Sama Sama began with the desire to rebuild in the wake of the global pandemic, which decimated Bali's main source of income – tourism. Our aim was to create products that supported the local economy and espoused global trends for sustainability, recycling and natural ingredients, crafted by hand. We aimed to allow the millions of people who had once enjoyed the island to align with a brand that connected them to island's creative energy.

OUR VISION

BALI
SAMA SAMA

Working With Local Artisans

We envisioned a company that would allow hotels, restaurants and retailers on Bali and in greater Indonesia to move away from mass produced glassware and support locally crafted and ethically sourced products with a story to excite their clients – products they could sell to tourists to allow them to take a piece of the island home.

OUR SOLUTION

BALI
SAMA SAMA

It Takes A Village

We realised that in order to fulfill our vision we would need to engage with local communities. It takes a village! Our handmade glassware, candles and scents provide an opportunity for local and international businesses to support our passion and retail a range of exceptional products built on solid foundations of quality, integrity and sustainability.

OUR PRODUCTS

BALI
SAMA SAMA

Handcrafted Quality

Our calling was to put Bali on the map for premium glassware, candles and scents that utilised local talent and natural resources to create unique products. We knew that everything we wanted to do needed to be based on the island, incorporate all-natural ingredients and be made by hand. Bali Sama Sama was born.

GLASSWARE

BALI
SAMA SAMA

Exceptional Craftmanship

Our glassware is made by Balinese people skilled in glass blowing, shaping and finishing, as well as artisans adept in creating natural wax and essential oils. Our glassware range is handcrafted in workshops in Gianyar, where we work with Balinese craftsmen and women to create innovative and exceptional products.

CANDLES

BALI
SAMA SAMA

Considered Candles

Our candles use only plant-based wax which is a blend of soy and locally harvested coconut as well as pure essential oils created using Indonesian ingredients. Our scents evoke a variety of moods to suit your feelings. Our wax is made by Balinese people who carefully mix and pour our scents into glassware we work to create.

SCENTS

BALI
SAMA SAMA

Pure, Natural Scents

Our blends use pure essential oils that are grown locally in Indonesia. Everything we do is carefully processed using traditional methods that ensure absolute purity in the essences we include in our range.

OUR PHILOSOPHY

BALI
SAMA SAMA

Ethical Production

We pride ourselves in working with and supporting local communities in Bali by providing tools and education where necessary. It is our aim to aid individuals and families in need, creating opportunities and innovative products that stand the test of time and engender opportunities for sustainable growth.

OUR PHILOSOPHY

BALI
SAMA SAMA

Defining Quality

The end result is quality. Our glasware is second to none. Our candles surpass other products on the market that use cheaper and more polluting ingredients. We strive for excellence in everything we do, in order to give you the pleasure and satisfaction of owning something truly unique.

Bespoke Glassware

Our range includes a variety of designs in different colours available for single or multiple purchases. We are also open to creating wholesale, bespoke and original pieces at your request.

OUR PRODUCTS

Upcycled

Upcycled glass is collected from recycling centres around Bali and delivered to our facility in Gianyar, where it is sorted for use in our glassblowing process.

Handmade

Talented artisans use traditional techniques to melt, shape and colour the glass into a variety of models for our range. The glass is set in cooling ovens to ensure it is strong and durable.

Unique

No two Bali Sama Sama pieces are exactly the same. This is because we use only handmade craftsmanship, giving each item a special connection to the island on which it is made.

Premium

The result is glassware of a very high quality using only local materials created by Balinese craftsmen and packaged in recycled boxes for distribution around the world.

Exquisite Candles

Our candles use only 100% plant-based wax mixed with pure essential oils sourced from the fields of Indonesia, then poured into handmade glassware. Our scents light up any room with an exquisite aroma that evokes a memory of our island home.

OUR PRODUCTS

A close-up photograph of several rectangular blocks of white, solid coconut wax. The wax blocks are piled together in a dark, woven basket. The background is a dark, textured surface, possibly wood or stone, which makes the white wax stand out. The lighting is soft, highlighting the texture of the wax.

Natural Wax

Local coconuts are split and the contents collected, then grated and pressed to produce a liquid which is heated and separated into 100% pure coconut oil. This is left to set into blocks of unadulterated wax.

Pure Essential Oils

Our essential oils are created using local plants and flowers grown by Indonesian farmers. We use only the highest grade and finest quality oils available on the island.

Recycled Glass

Recycled glass is collected from recycling centres around the island, then heated to 5,000 degrees Centigrade in ovens before being blown, coloured and shaped to hold our wax.

Designed To Keep

Our candles are designed to be reused. Unlike most candles that - once finished - are discarded, our products are designed to be reused.

Stand Out Scents

Our blends were designed to take you back to your experience of being in Bali, whether it be the scent of sea spray on your face on a remote beach or the grounding feeling of watching the sun set over emerald rice fields.
